PROJECT DESIGN PHASE: PROBLEM-SOLUTION FIT

Problem – Solution Fit Template

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

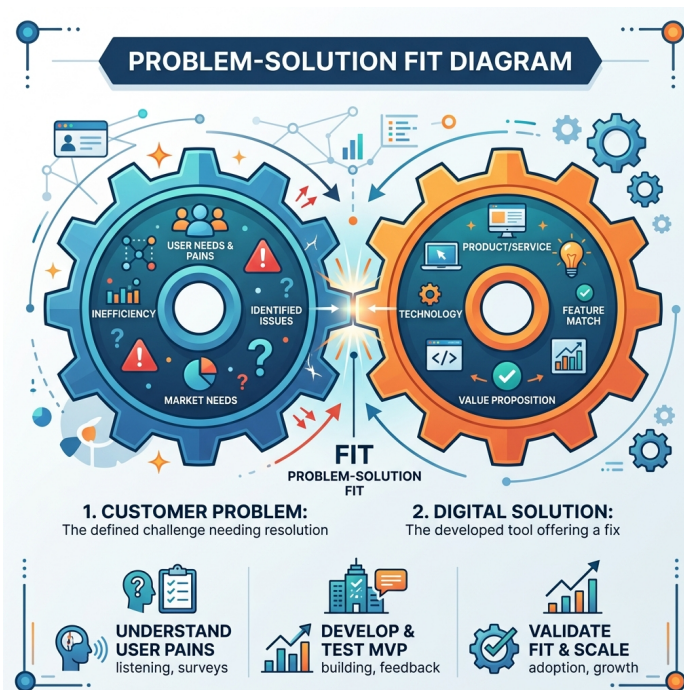

Figure 1: Problem-Solution Fit diagram depicting customer needs alignment with system solutions.

Purpose of the Template

By structuring our development cycles around the Problem-Solution Fit, we achieved the following core objectives:

- **Solve Complex Customer Pain Points:** Providing an easy, direct checkout page to simplify ordering and prevent cart abandonments.
- **Accelerate Solution Adoption:** Tapping into simple online browsing layouts that match familiar e-commerce patterns.
- **Improve Target Group Situation:** Allowing small booksellers to list items and process orders directly with zero technology overhead.
- **Build Trust with Verified Channels:** Using an administrator verification queue to approve and monitor active sellers.

Bookstore (BookVerse) Problem-Solution Fit Analysis

Our project directly maps Small Bookstore barriers to clear engineering features:

- **Customer Friction:** Solved by introducing an instant "Buy Now" checkout collecting customer delivery names and addresses in one step.
 - **Seller Accessibility:** Solved by creating dedicated Seller Dashboards to add books, upload cover art files, and track shipment log states.
 - **System Integrity:** Solved by introducing an Admin control board to approve new vendor registrations and delete outdated entries.
