IDEATION PHASE: EMPATHIZE & DISCOVER

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map Quadrants Detail

SAYS (Explicit Statements):

"I want to purchase my college textbooks directly from verified small vendors without high middleware markups."

THINKS (Internal Beliefs):

"Is the online stock count accurate? I hope my credit card details are safe and shipping takes less than a week."

DOES (Observed Actions):

Browses the BookVerse digital collection, filters by children's or children fiction category, and tracks order statuses.

FEELS (Emotional States):

Feels hopeful about finding rare titles locally, but experiences friction during slow checkouts or complex carts.
