PROJECT DEVELOPMENT PHASE: WALKTHROUGH

Project Demonstration & Execution Guide

The Book Store (BookVerse) application is fully deployed and verified. To demonstrate the working features of the system, this document outlines the core client views, vendor dashboards, and administrator interfaces page-by-page.

Live Project Access

The live online website is hosted on Render at:

<https://book-store-nzxy.onrender.com/>

The following pages present screenshots of each workflow in action.

1. Guest Home Landing Page

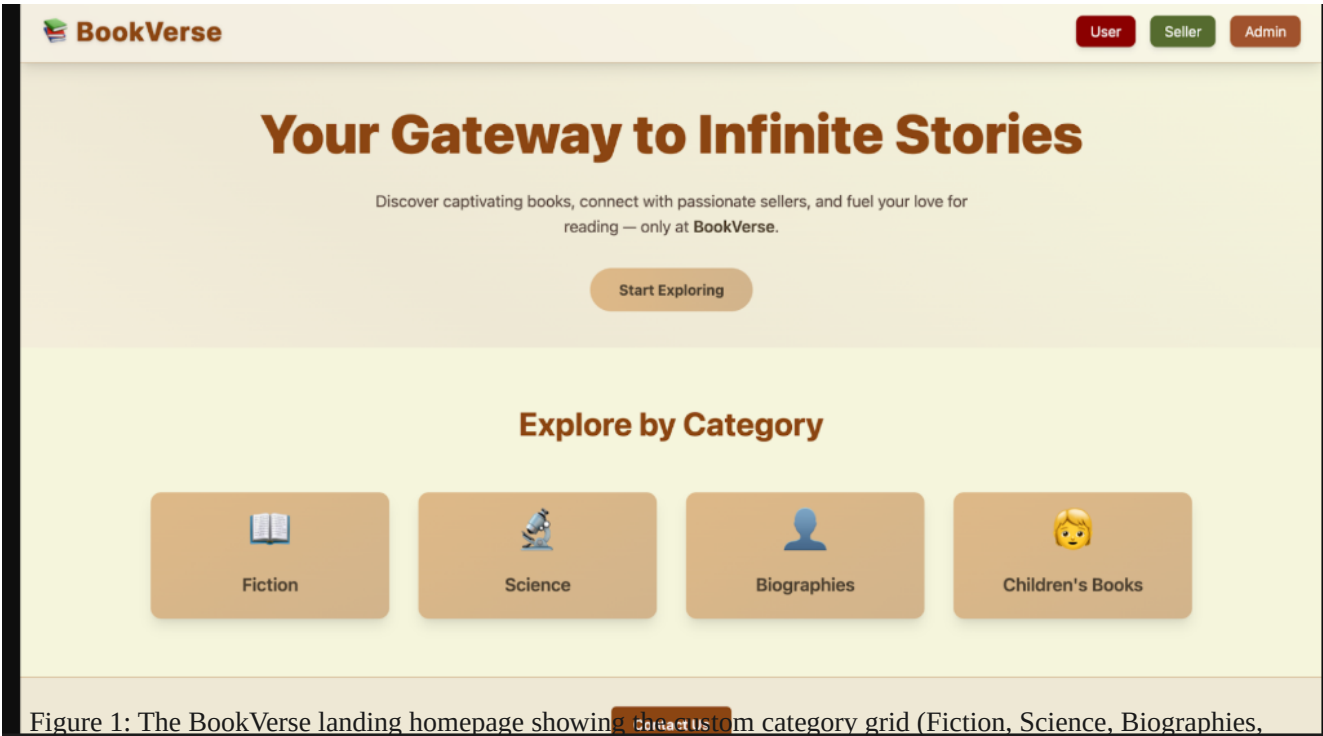

Figure 1: The BookVerse landing homepage showing the custom category grid (Fiction, Science, Biographies, Children's Books) and multi-role login badges.

2. Administrator Dashboard

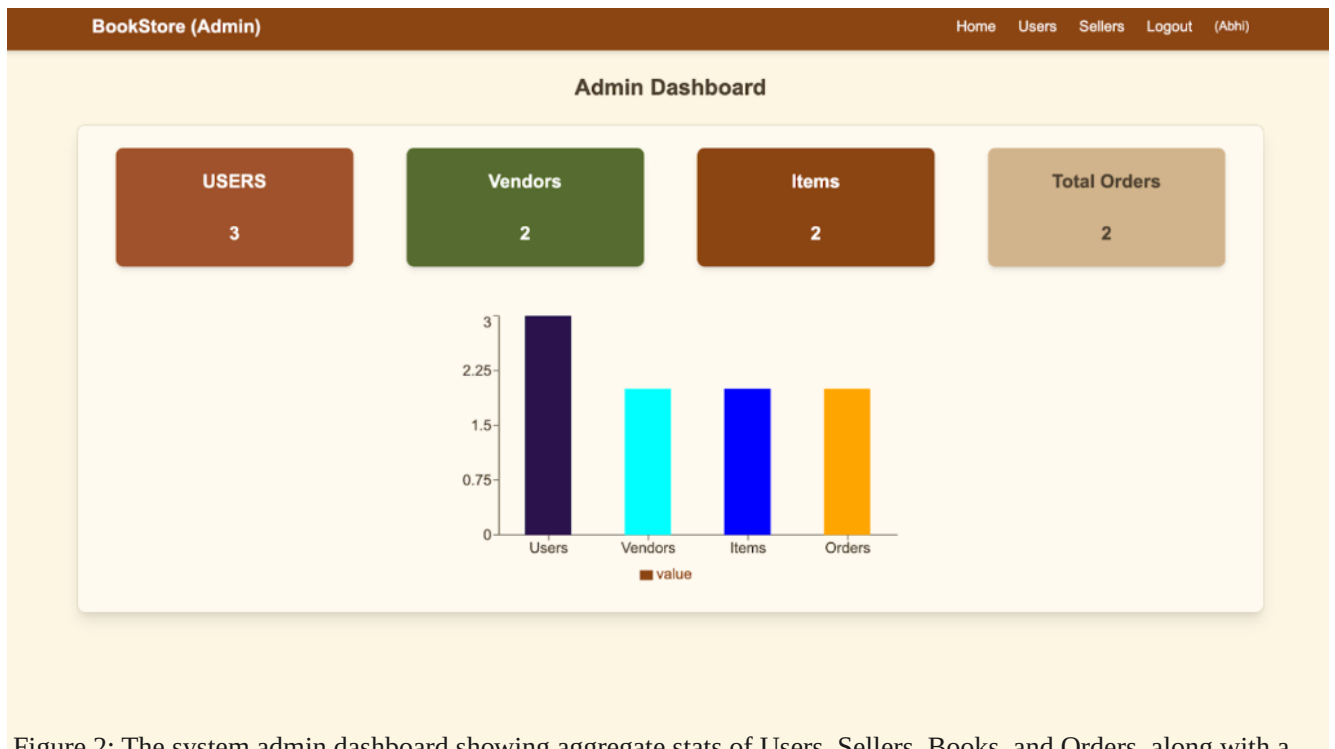

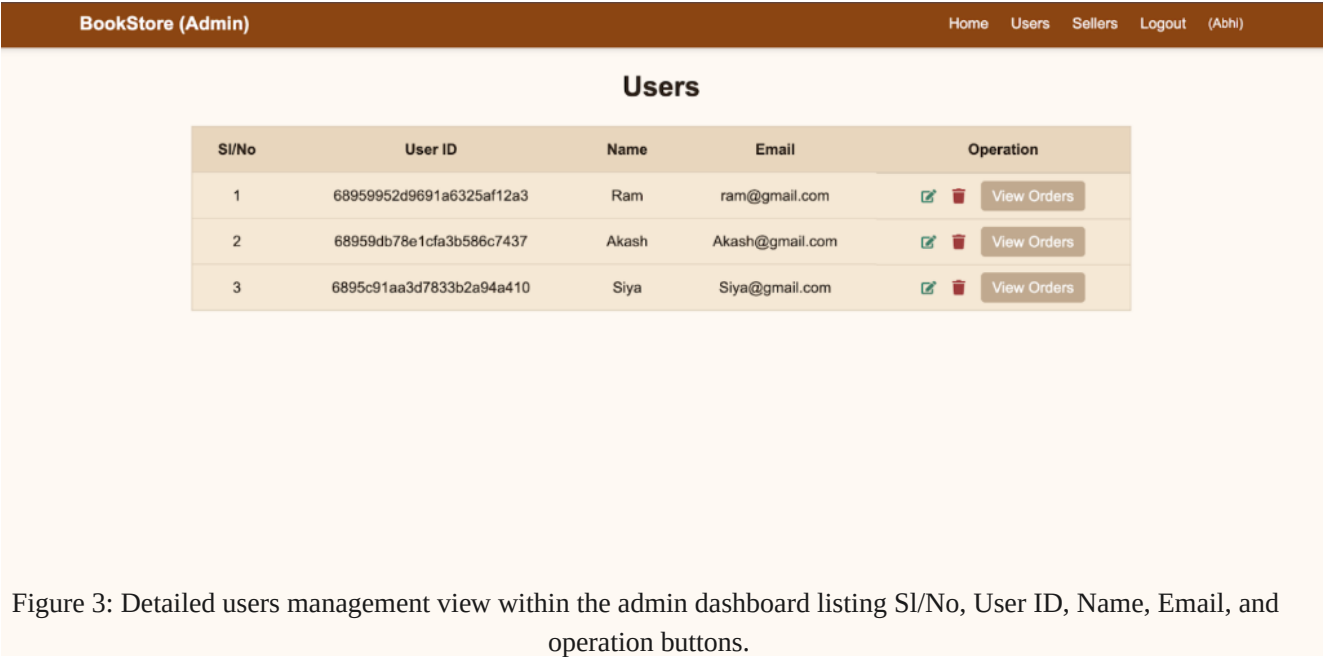

Figure 2: The system admin dashboard showing aggregate stats of Users, Sellers, Books, and Orders, along with a custom SVG vertical chart.

3. Admin Users Management List

4. Seller Dashboard

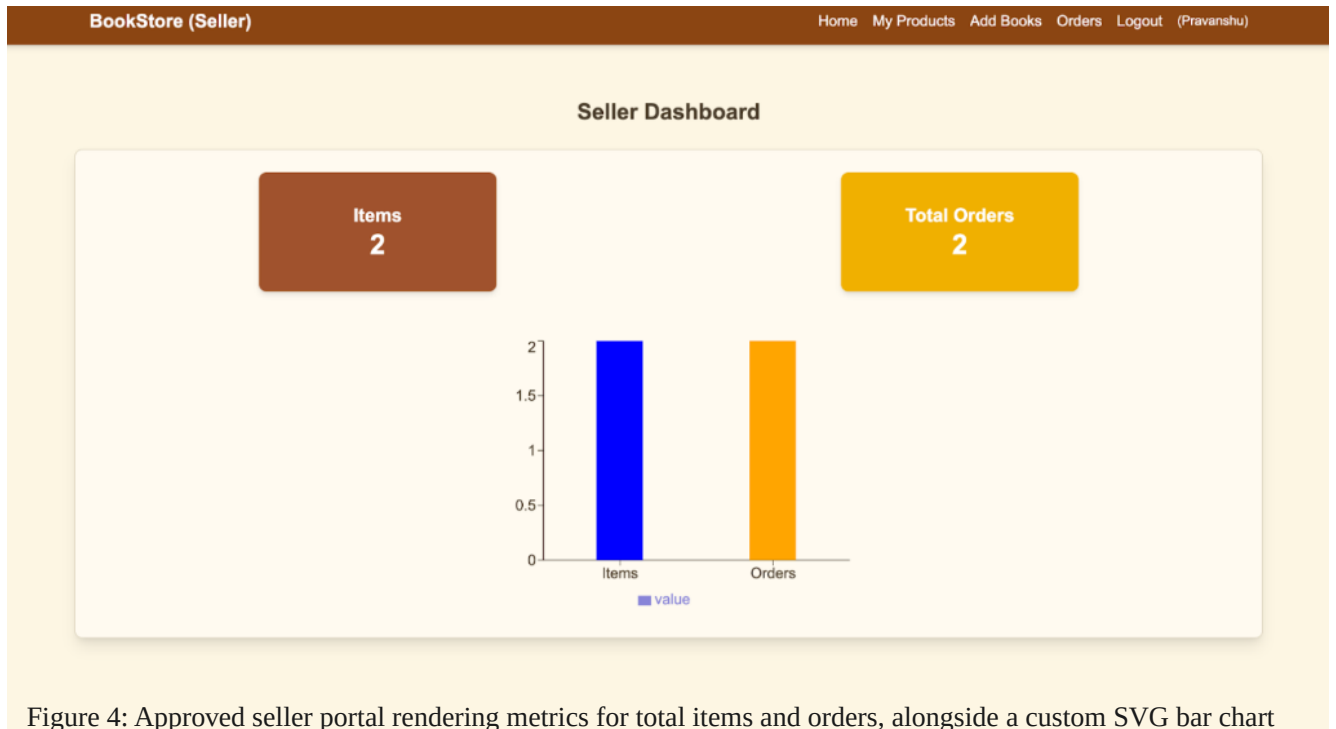

Figure 4: Approved seller portal rendering metrics for total items and orders, alongside a custom SVG bar chart indicating the seller's specific counts.

5. Seller Listed Books

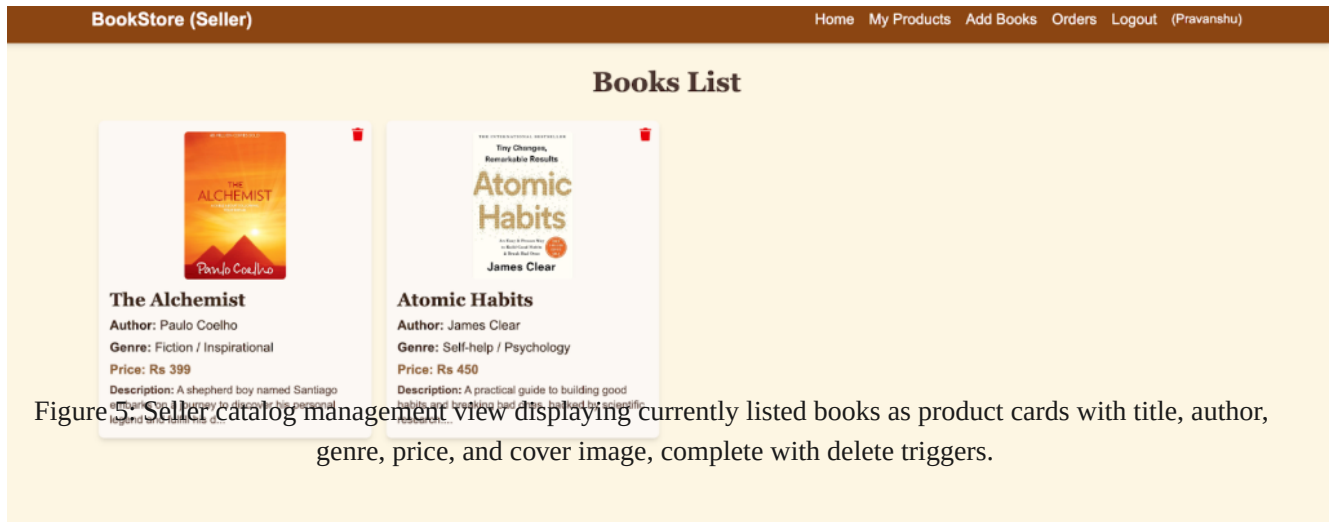

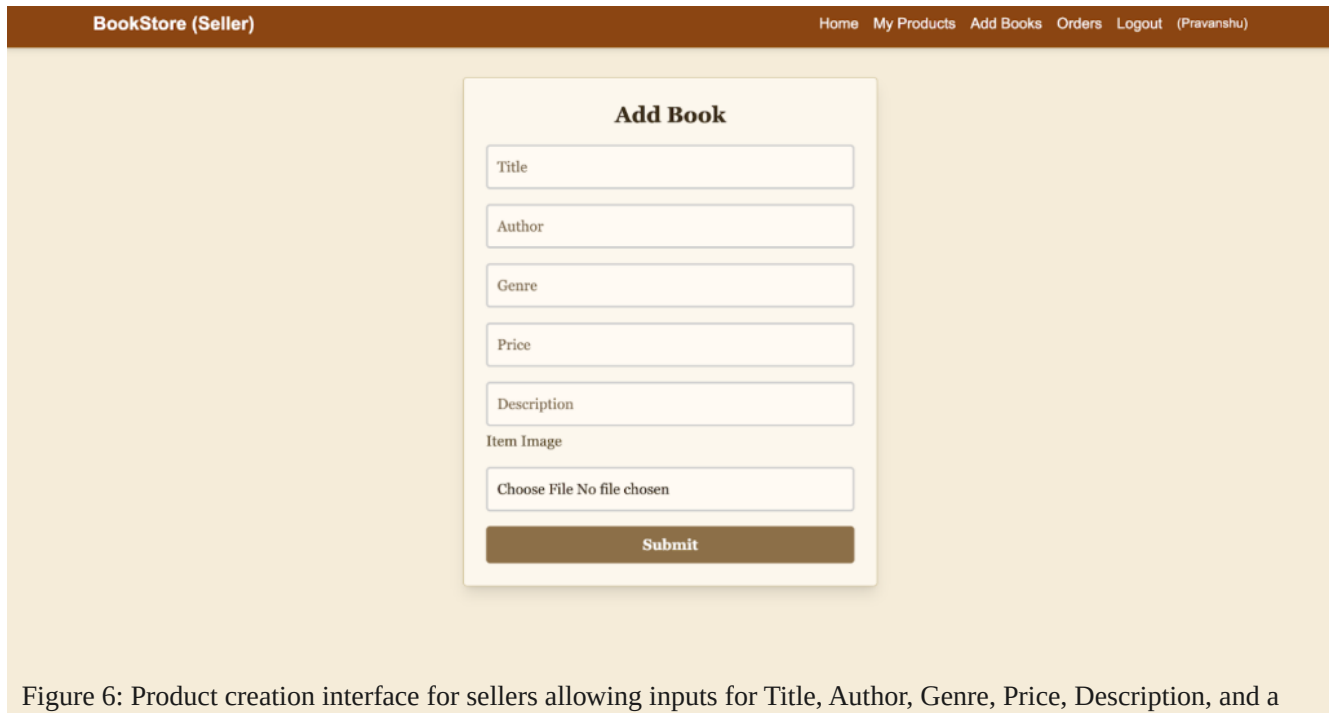

Figure 5: Seller catalog management view displaying currently listed books as product cards with title, author, genre, price, and cover image, complete with delete triggers.

6. Seller Add Product Form

The screenshot displays a web application for a seller's bookstore. At the top, a dark brown navigation bar contains the text "BookStore (Seller)" on the left and a series of links: "Home", "My Products", "Add Books", "Orders", "Logout", and "(Pravanshu)" on the right. The main content area has a light beige background. Centered in this area is a white rectangular form with a thin brown border and a subtle drop shadow. The form is titled "Add Book" in bold black text. It contains six input fields stacked vertically: "Title", "Author", "Genre", "Price", "Description", and "Item Image". The "Item Image" field is a file upload control showing "Choose File" and "No file chosen". Below these fields is a solid brown "Submit" button.
